

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

mold of strongly-baked clay, — the negative of a human face, — containing within it the figure which it was designed to reproduce, was shown. The collection contains twenty-seven specimens. Three specimens of copper were also exhibited, namely, a finger-ring, a long needle with an eye, and a chisel with a smooth edge and battered head.

THE APPALACHIAN MOUNTAIN CLUB, Boston. — April 12th. Mr. S. H. Scudder read a paper on The Correct Name of the Mountain called Pequawket or Kiarsarge, which was followed by considerable discussion, in which Mr. Emery, of Exeter, N. H., quoted from a journal of Samuel Willard, an old scout, written in 1725, to prove that the country round about was formerly called Pequawket, and that should be the proper name of the mountain. Mr. George Fox argued that while this was a name of the territory, it should not be applied to the mountain at all. Mr. J. B. Henck, Jr., who has made a partial map of the mountain region, read a paper on The Construction of a New Map of the White Mountains. Mr. Warren Upham read a paper on The East Branch of the Pemigewassett, which he had visited the past summer; and Prof. E. C. Pickering made a communication on Professor Bond's Manuscripts relating to the White Mountains.

The first field meeting of the club will be held at North Conway, N. H., on the fourth Wednesday in July.

SCIENTIFIC SERIALS.¹

ARCHIV FÜR MIKROSKOPISCHE ANATOMIE. — On the Pulsating Ventral Sinus of Insects, by V. Graber. Comparative Developmental History of *Comatula mediterraniensis*, by Alex. Goette.

PETERMANN'S GEOGRAPHISCHER MITTHEILUNGEN. — March 21st. Cernik's Expedition through the Region of the Euphrates and Tigris. April 5th. Cameron's Journey across Africa, by E. Behm. Journey in New Zealand. Swedish, Russian, and Dutch Journeys to West Siberia.

ANNALS AND MAGAZINE OF NATURAL HISTORY. — June. Notes on Otto Hahn's Micro-Geological Investigation of *Eozoön Canadense*, by W. B. Carpenter. On the Identity in Type of the Annelids and Vertebrates, by C. Semper.

AMERICAN JOURNAL OF SCIENCE AND ARTS. — June. The Geological Survey of Brazil, by C. F. Hartt. On a New Sub-Order of Pterosauria, by O. C. Marsh. Notice of New Odontornithes, by O. C. Marsh. — July. The Colorado Plateau Province as a Field for Geological Study, by G. K. Gilbert. On a Disease of Olive and Orange Trees occurring in California in the Spring and Summer of 1875, by W. G. Farlow.

¹ The articles enumerated under this head will be for the most part selected.
